Preface

The United States Air Force Occupational Measurement Center (USAFOMC), Training Development Services Division (OMT), is assigned primary responsibility for developing Training Requirements Analyses (TRAs) for Air Force specialties. A TRA provides comprehensive data describing specialty training requirements for the 3-, 5-, and 7-skill levels. TRAs provide a basis for revision or development of Specialty Training Standards (STS)s, initial skill training, on-the-job training (OJT), and Career Development Courses (CDCs). TRAs fulfill most requirements of Steps 1 and 2 of the Instructional System Development (ISD) model prescribed in AFR 50-8. TRAs assist Air Force officials in making informed, data-based training decisions.

HQ USAF Broadcasting Squadron (AFBS), Kelly, AFB Texas, requested this TRA. It consists of three sections:

- a. System Overview--an overall perspective of the specialty.
- b. Task Analysis--detailed training decision data.
- c. Training Recommendations--general and specific recommendations to improve specialty training.

Copies of this report are available to Air Staff sections, major commands, the OJT community, and other interested training and management officials. Address requests to USAFOMC/OMT, Randolph AFB, Texas 78150-5000; or to Detachment 4 USAFOMC, Stop 47, Sheppard AFB Texas 76311.

BOBBY P. TINDELL, Col, USAF
Commander

Center

EXECUTIVE SUMMARY

Overview

HQ Air Force Broadcasting Squadron requested this TRA to provide comprehensive information as a basis for training decisions and development of resident and on-the-job training.

Procedures

Data for this TRA were gathered during field interviews with personnel at the Basic Broadcaster Course, Fort Benjamin Harrison, Indiana; and with European Broadcasting Squadron personnel at Ramstein, Incirlik, and Torrejon Air Bases. A total of 19 Subject Matter Experts (SMEs) were interviewed. Results of interviews were mailed to Pacific Broadcasting Squadron detachments at Yakota and Clark Air Bases for review.

Results

Specialty members who attend contractor-provided equipment training are often unable to effectively transfer what they have learned to others who do not attend this training.

Recommendation. Enhance OJT programs: video tape equipment training provided by contractors and use in conjunction with qualification training packages (QTPs). Include provisions in future contracts to video tape these training sessions.

The STS does not include training requirements for setting up and adjusting studio lighting nor does it differentiate between control track or electronic time code editing. The STS also lacks items for operation of tape degausers and interpretation of technical publications. Specific job performance requirements were documented during task analysis and compared with the May 1988 STS for AFSC 791X1. Results are presented in the Training Recommendations section of this report.

Recommendation. Use the Specific Recommendations section of this TRA (page 8) as a tool to update the STS.

Specific broadcast standards for job performance are often lacking for tasks of a creative nature making it difficult to assess adequacy of job performance and training.

Recommendation. Assess job standards to identify areas of ambiguity and initiate actions to develop specific job performance standards. Use these standards as a basis for evaluating training adequacy. The task analysis worksheets provided in this report include information that may be used to develop standards for task performance.

INTRODUCTION

Purpose

on this job training
Air Force *Training Requirements*
The purpose of the ~~AF~~ Broadcasters (TRA) is to provide objective information to improve specialty training. This TRA provides information for developing Specialty Training Standards (STS), Job Qualification Standards (JQS), OJT programs, and resident and nonresident curricula. The TRA will be useful during Utilization and Training Workshops (UTWS) where significant training decisions can be based upon accurate task data and systematically derived training recommendations.

The TRA consists of three sections:

- 1) System Overview. This section describes mission objectives, training requirements, training issues and concerns, and future plans.
- 2) Training Recommendations, *and* Recommendations are based upon task analysis and system overview information. Tasks analyzed in this TRA are cross-referenced (matched) to the May 1988 STS for AFSC 791X1.
- 3) Task Analysis. This detailed description of specialty tasks includes equipment, references, conditions, cues, standards, activities, skills, and knowledge required for task performance. Task analysis data are provided for training managers to use in developing the STS and subsequent course documents for resident and OJT programs.

2.0 to 2.1 *Performance Standards*
References
12.0000 Requirements

SYSTEM OVERVIEW

Specialty Mission and Functions

The mission of Radio and Television Broadcasting personnel, as described by AFR 39-1, is to create programs for radio and television broadcasts, prepare informational materials in broadcast format for Armed Forces Radio and Television (AFRTS), operate broadcast equipment, and serve as talent.

Within the Armed Forces Broadcasting Service (AFBS), broadcasters are assigned to one of five functional areas: Television Operations, Radio, News, Production, and Continuity.

Television Operations personnel play recorded video materials for television broadcasts by operating control boards and other television playback equipment. When AFRTS Satellite Network (SATNET) is available, sportscasts and other materials may be broadcast live or recorded for delayed broadcast.

Radio broadcasters produce and broadcast live and recorded music shows; select, prepare, and read news and information from newswire service; operate associated radio broadcast equipment; and maintain audio libraries.

News broadcasters gather, write, produce, and broadcast news and internal information by radio and television. Newscasts may vary from local to international levels depending upon station mission.

Production personnel conceptualize, develop, and produce internal information spots and other programs.

Continuity personnel develop schedules for station broadcasts, studios, and production functions. They also develop Workload Factor Data Reports on the Organizational Network of Extended Terminals.

Station managers ensure that stations operate efficiently, comply with directives, produce quality products, and maintain station signals.

Resident Training

This section outlines the training available to Broadcasters as they progress through their careers. Additional information is contained in AFR 50-5.

MANDATORY REQUIREMENTS FOR
ENTRY INTO AFSC 791X1
Favorable voice audition
Type 20 words per minute

Basic Broadcaster Course
G5ABA79131 000
Length: 60 Days
Location: Ft Harrison IN

Radio and Television
Broadcasting Specialist
CDC 79151
Length: Self Paced

Electronic Journalism Course
G5AZA79151 000
Length: 10 Days
Location: Ft Harrison IN

Air Force Short Course in
Communication
Length: 40 Days
Location: University of
Oklahoma at Norman OK

Broadcast Manager Course
G5OZA7921 004
Length: 20 Days
Location: Ft Harrison IN

Public Affairs Supervisor
Course G5AZA79170 000
Length: 15 Days
Location: Ft Harrison IN

Senior Enlisted Public
Affairs G5AZA79170 001
Length: 5 Days
Location: Ft Harrison IN

Personnel

As of March 1990, 337 airman are in AFSC 791X1 with 104 in CONUS and 233 overseas. This specialty consists of 120 first term, 86 second term, and 131 career airman. AFSC 79199 and 79100 personnel are not included in this information because AFSC 791X1 personnel merge with AFSC 791X0s at the nine-skill level.

Training Issues and Concerns

This section summarizes training issues, concerns, and problems identified during interviews with AFSC 791X1 personnel and during subsequent analysis of task analysis data. Training issues addressed in this report include:

- a. Members who attend contractor-provided equipment training are often unable to effectively transfer what they have learned to others.
- b. The STS does not include training requirements for setting up and adjusting studio lighting nor differentiate between control track or electronic time code editing.
- c. Specific broadcast standards for job performance are sometimes lacking; it is often difficult to assess adequacy of job performance and training.

Future Developments

Broadcasting is a dynamic specialty in which new technology constantly emerges. New equipment that is or soon will be on line includes digital still store, digital video effects, graphics generator, and time code editing. Training programs will need updating to ensure full utilization of this and future equipment.

Related Reports

1. A Tri-Service Occupational Survey Report (OSR) for Public Affairs and Broadcast personnel will be completed by January 1993. This OSR will provide objective data as a basis for determining the content of resident and on-the-job training programs.
2. Other TRAs that may be useful to training developers and OJT managers in this AFSC are:
 - a. Airmen Visual Information Specialist, AFSC 23XXX, October 1989, and
 - b. Television Equipment Specialist, AFSC 304X5, February 1989.

TASK ANALYSIS

Task Analysis Procedures

Task analysis data collection began in October 1989 with a task list developed at HQ AFBS. Two training systems analysts from Detachment 4, USAFOMC visited the following locations to collect task analysis data:

- a. AF Broadcasting Course, Fort Benjamin Harrison, Indiana
- b. HQ AFEBS, Ramstein AB, Germany
- c. Detachment 5 AFEBS, Incirlik AB, Turkey
- d. Detachment 6 AFEBS, Torrejon AB, Spain

Detachment chiefs selected qualified broadcasting personnel for interviews. Task analysis data collected during the interviews were subsequently mailed for validation to Detachment 1 AFPBS, Clark AB, PI; and Detachment 7 AFPBS, Yokota AB, Japan.

Task Analysis Worksheets

Task analysis worksheets include: NOTES, RECOMMENDATIONS, EQUIPMENT, REFERENCES, CONDITIONS, CUES, CONSTRAINTS, STANDARDS, ACTIVITIES, SKILLS, AND KNOWLEDGE.

1. The TASK NOTES section provides training recommendations and other pertinent information. TRAINING RECOMMENDATIONS indicate where (course, CDC, OJT) and at what skill level each task should be trained. A "K" under the 3-, 5-, or 7-skill level column indicates a requirement for knowledge training; "P" indicates a requirement for performance training.
2. The EQUIPMENT section lists all equipment, tools, and supplies required to perform the task.
3. The REFERENCES section lists the governing directives required to perform the task. This includes military directives, manufacturer's manuals, and local directives.
4. The CONDITIONS, CUES, AND CONSTRAINTS sections list the environmental conditions for task performance, what initiates the task performance, and what may affect task performance.
5. The STANDARDS section specifies the criteria against which task performance can be measured to determine correct accomplishment of the task.
6. The ACTIVITIES, SKILLS, AND KNOWLEDGE sections list major steps and the skills and knowledge required to perform each task.

Common Skill and Knowledge Requirements

Common skill and knowledge requirements are prerequisite abilities that support task performance. Many skill and knowledge requirements are not specifically identified in regulations or manuals. On the job it is assumed personnel have the required skills and knowledge. To build a successful training program, common prerequisite skills and knowledge need to be identified and built into the training system. The following list of common skill and knowledge requirements was identified from task analysis data. STS elements are shown in parentheses and refer to the recommended STS beginning on page 10. The number of occurrences (tasks supported) are also listed.

SKILLS		Occurrences
Operate audio and video monitors (8c(5))		18
Operate TV monitors (8c(5))		16
Operate video tape recorders (8b(3)(c))		16
Operate in-studio and remote audio consoles (8a(2))		14
Operate microphones (8a(1))		13
Operate cart machines (8a(3)(b))		10
Operate recorders such as cassette and reel-to-reel (8a(3)(a),(c))		10
Operate audio and video patch panels (8a(5),b(12))		9
Operate video switcher (8b(4))		8
Operate vector scope and wave form monitor (8a(6))		7
Operate word processor (6k(1))		7
Operate turntables (8a(7))		6
Operate compact disk player (8a(10))		5
Operate studio lighting systems (8c(a), (b) *		5
Operate tape degausser (8a(5) *		4

KNOWLEDGE		Occurrences
Apply station policy **		21
Interpret regulations, commercial manuals, and operating instructions (6f) *		20
Interpret host nation sensitivities (12a(4)(b), (5)(b), c(5)(b))		19
Interpret textbooks **		15
Apply editing procedures (10d)		7
Apply broadcast style writing techniques (11c(1))		6

* Recommended STS additions

** Not recommended for addition to STS

TRAINING RECOMMENDATIONS

Overview

Recommendations within this section represent the optimum training for the Broadcasting specialty. They are designed to create the best possible training environment. The priority and feasibility for implementation of the recommendations will be determined by HQ AFBS personnel and U&TW participants.

General Recommendations

1. Develop Qualification Training Packages (QTPs) for personnel who do not attend contractor-provided equipment training. These QTPs may be enhanced by video taping contractor-provided training sessions.

Comments from Broadcast personnel indicate training is not effectively shared with personnel who are unable to attend contractor-provided courses. Those who attend contract training must rely on memory, notes, and commercial manuals that are often difficult to use or understand. Video tapes of contract courses will enable trainers to provide consistent equipment training. Use of QTPs will also help standardize training on new equipment.

2. Include STS items for set up and adjustment of studio lighting, operate tape degausser, and time code editing. Also add an STS item for interpretation of technical publications (see Specific Training Recommendations section, page 8).

Training for lighting tasks is insufficient. Broadcast personnel lack expertise in set up and adjustment of studio lighting. The tape degausser is common equipment used by this AFSC and should be included in the STS. The advent of time code editing will require the differentiation between it and control track editing.

3. Develop specific AFBS broadcast standards to better define air quality and performance requirements.

Standards for creative or subjective tasks were difficult to define. Broadcast personnel performing these tasks are concerned with the variance in standards among supervisors or detachment chiefs. Unless trainers and trainees know the criteria against which task performance is measured, they cannot determine if tasks have been successfully learned. Specific standards are needed to better define air quality and performance requirements.

Specific Recommendations

The May 1988 STS (see page 10) was matched with specific training recommendations resulting from this TRA. The column to the right summarizes our recommended actions (add, delete, review, or none) to improve the STS. "Review" indicates that the STS item should

be reviewed; task analysis data indicate a discrepancy but the data are not conclusive enough to recommend a change to the STS. A "K" under the 3-, 5-, or 7-skill level column indicates a requirement for knowledge training and a "P" indicates a requirement for performance training. Listing a "K" under both both course and CDC columns indicates task knowledge should be taught in the course and subject or system knowledge should be included in the CDC. The specific knowledge requirements for each task are listed on the task analysis worksheets (see Appendix A).

TASK #: 00630

TASK: DEVELOP TV PROGRAM PROMO'S

TRAINING RECOMMENDATION:

A			B			C		
3 SKILL LEVEL			5 SKILL LEVEL			7 SKILL LEVEL		
(1)	(2)	(3)	(1)	(2)	(3)	(1)	(2)	(3)
CRS	CDC	OJT	CRS	CDC	OJT	CRS	CDC	OJT
___	___	___	___	_K_	_P_	___	___	___

EQUIPMENT:

VTR, VIDEO MONITOR, CHARACTER GENERATOR, EDIT CELL, WAVE FORM MONITOR, VIDEO SWITCHER, VIDEO TAPE, PROGRAM TAPES, TRADE MAGAZINES, TV LOG, VECTOR SCOPE, TIME BASE CORRECTOR, VIDEO PATCH PANEL, AUDIO MIXER, CARTRIDGE TAPE RECORDER/PLAYER

REFERENCES:

STATION OPERATING INSTRUCTIONS

CONDITIONS: CONDUCTED IN EDIT CELL

CUE: SUPERVISOR OR STATION MANAGER DIRECTION

CONSTRAINTS: LACK OF VIDEO SOURCE, MATURE THEMES

JOB STANDARDS:

IAW REFERENCE

ACTIVITIES:

- A REVIEW NEW PRIMETIME SHOWS OR SPECIALS
- A SELECT SHOW TO BE PROMOTED
- A IDENTIFY TARGET AUDIENCE
- A SELECT BYTE(S) OF SHOW THAT WILL CAPTURE AUDIENCE INTEREST (TASK # 00530)
- A WRITE SCRIPT TO INFORM AUDIENCE OF PROGRAM AND AIR TIME (TASK # 00540)
- A RECORD ANNOUNCER AUDIO (TASK # 00270)
- A EDIT ANNOUNCER AUDIO AND SHOW BYTES TOGETHER ONTO WORKING VIDEO TAPE (TASK # 00620)
- A OBTAIN SUPERVISOR'S APPROVAL OF PROMO
- A ENTER SHOWS TITLE, AIR DATE, AND AIR TIME INTO CG (TASK # 00350)
- A RERECORD PROMO ONTO PROMO AIR TAPE ADDING CG EFFECTS
- A PERFORM QUALITY CONTROL CHECK OF PROMO FOR ERRORS (TASK # 00360)
- A SLATE PROMO TAPE

ACTIVITIES:

- A ADD COUNTDOWN TO TAPE
- A FILE TAPE IN APPROPRIATE LOCATION

SKILLS:

- S OPERATE VTR
- S OPERATE VIDEO MONITOR
- S OPERATE CG
- S OPERATE EDIT CELL
- S OPERATE WAVE FORM MONITOR
- S OPERATE VIDEO SWITCHER
- S OPERATE VECTOR SCOPE
- S OPERATE TIME BASE CORRECTOR
- S OPERATE VIDEO PATCH PANEL
- S OPERATE AUDIO MIXER
- S OPERATE CARTRIDGE TAPE RECORDER PLAYER

KNOWLEDGE:

- K INTERPRET STATION TELETIPS
- K INTERPERT OPERATING INSTRUCTIONS
- K INTERPRET TRADE MAGAZINES
- K RECALL STATION POLICY
- K INTERPRET SECTION OPERATING INSTRUCTIONS
- K APPLY SCRIPT WRITING PROCEDURES
- K APPLY VOICE RECORDING TECHNIQUES
- K APPLY EDITING PROCEDURES

TASK #: 00640

TASK: COORDINATE MAINTENANCE OF RADIO OR TELEVISION EQUIPMENT

TRAINING RECOMMENDATION:

A			B			C		
3 SKILL LEVEL			5 SKILL LEVEL			7 SKILL LEVEL		
(1)	(2)	(3)	(1)	(2)	(3)	(1)	(2)	(3)
CRS	CDC	OJT	CRS	CDC	OJT	CRS	CDC	OJT
—	—	—	—	_K_	_P_	—	—	—

EQUIPMENT:

PASSDOWN LOG, EQUIPMENT MAINTENANCE LOG, AFTO FORM 349

REFERENCES:

TO 00-20-2, STATION OPERATING INSTRUCTIONS

CONDITIONS: NONE

CUE: EQUIPMENT MALFUNCTION

CONSTRAINTS: NONE

JOB STANDARDS:

IAW REFERENCES

ACTIVITIES:

- A DISCOVER DISCREPANCY
- A ANNOTATE DISCREPANCY ON AFTO FORM 349
- A INFORM MAINTENANCE OF THE EQUIPMENT DISCREPANCY
- A ANNOTATE EQUIPMENT LOSS IN PASSDOWN LOG
- A REPORT DISCREPANCY TO SECTION NCOIC

KNOWLEDGE:

- K RECALL STATION POLICY
- K INTERPRET OPERATING INSTRUCTIONS
- K INTERPRET TECHNICAL ORDERS

TASK #: 00650

TASK: CLEAN AUDIO RECORDING OR PLAYBACK HEADS

TRAINING RECOMMENDATION:

A			B			C		
3 SKILL LEVEL			5 SKILL LEVEL			7 SKILL LEVEL		
(1)	(2)	(3)	(1)	(2)	(3)	(1)	(2)	(3)

MANUALS

CONDITIONS: INSIDE, DUST FREE ENVIRONMENT

CUE: RADIO OR TELEVISION LOGS, OPERATING INSTRUCTIONS, POOR
SOUND QUALITY

CONSTRAINTS: ENGINEER CERTIFICATION TO CLEAN EQUIPMENT

JOB STANDARDS:

IAW REFERENCES

ACTIVITIES:

A GAIN ACCESS TO HEAD, CAPSTANS, AND PINCH ROLLERS
A DAMPEN COTTON SWAB WITH ALCOHOL
A CLEAN HEAD USING SIDE TO SIDE MOTION
A REPEAT WITH NEW SWABS UNTIL COTTON SWAB COMES OUT CLEAN
A ENSURE THE PLAYER IS ON
A CLEAN CAPTSAN WITH UP AND DOWN MOTION
A REPEAT WITH NEW SWABS UNTIL COTTON SWAB COMES OUT CLEAN
A CLEAN PINCH ROLLER WITH UP AND DOWN MOTION
A REPEAT WITH NEW SWABS UNTIL COTTON SWAB COMES OUT CLEAN
A RETURN UNIT TO SERVICE

KNOWLEDGE:

K RECALL TAPE HEAD ACCESS METHODS
K RECALL CLEANING PROCEDURES
K RECALL CARTRIDGE CLEANING METHODS
K INTERPRET PMI CARDS
K INTERPRET COMMERCIAL MANUALS

TASK #: 00660

TASK: CLEAN VIDEO RECORDING OR PLAYBACK HEADS

TRAINING RECOMMENDATION:

A			B			C

WARNING: THIS TASK SHOULD NOT BE ATTEMPTED BY UNQUALIFIED
PERSONNEL THE VIDEO HEAD IS EASILY DAMAGED

EQUIPMENT:

CHAMOIS, ALCOHOL, VTR, TELEVISION LOG

REFERENCES:

LOCAL PMI CARDS, COMMERCIAL MANUALS

CONDITIONS: INSIDE, DUST FREE ENVIRONMENT, POWER DISABLED

CUE: POOR VIDEO, POOR AUDIO, POOR EDITS, LACK OF CONTROL TRACK,
TELEVISION LOG

CONSTRAINTS: AUTHORIZED TO PREFORM TASK BY ENGINEERING SECTION,
HOURS OF OPERATION

JOB STANDARDS:

IAW REFERENCES

ACTIVITIES:

- A TURN OFF VTR POWER
- A REMOVE JEWELRY, WATCHES
- A REMOVE VTR COVER
- A DAMPEN CHAMOIS WITH ALCOHOL
- A APPLY CHAMOIS TO VIDEO HEAD WITH LIGHT PRESSURE (PERPENDICULAR
TO VIDEO HEAD WITH INDEX FINGER RESTING ON NON-MOVABLE BASE)
- A ROTATE VIDEO HEAD AGAINST DAMP CHAMOIS
- A CLEAN CONTROL TRACK HEAD
- A CLEAN AUDIO HEAD
- A CLEAN ALL OTHER SURFACES THAT CONTACT THE TAPE
- A REPLACE COVER
- A TURN VTR POWER ON

KNOWLEDGE :

K INTERPRET PMI CARDS
K INTERPRET COMMERCIAL MANUALS
K RECALL TAPE PATH
K RECALL HEAD CLEANING CAUTIONS
K RECALL VIDEO, CONTROL TRACK AND AUDIO HEAD FUNCTION AND
LOCATION

TASK #: 00670

TASK: CLEAN STUDIO CAMERAS OR ACCESSORIES

TRAINING RECOMMENDATION:

A			B			C

EQUIPMENT:

CLEAN LINT FREE CLOTH, CLEANING FLUID

REFERENCES:

SECTION OPERATING INSTRUCTIONS

CONDITIONS: IN STUDIO

CUE: BEFORE OPERATE, WHEN DIRTY

CONSTRAINTS: NONE

JOB STANDARDS:

IAW REFERENCE

ACTIVITIES:

- A WIPE LENS WITH A CLEAN LINT FREE CLOTH (MAY REQUIRE CLEANING SOLUTION)
- A ENSURE LENS IS CLEAN BY LOOKING THROUGH VIEW FINDER WHILE CAMERA IS ON
- A REMOVE VIEW FINDER LENS
- A WIPE LENS WITH CLEAN LINT FREE CLOTH
- A REINSTALL VIEW FINDER LENS
- A DUST CAMERA WITH CLEAN LINT FREE CLOTH
- A CLEAN TELEPROMPTER SCREEN WITH A CLEAN LINT FREE CLOTH

SKILLS:

S OPERATE CAMERA

KNOWLEDGE:

- K RECALL CLEANING PROCEDURES
- K INTERPRET SECTION OPERATING INSTRUCTIONS

TASK #: 00680

TASK: CHANGE BULBS IN LIGHTING FIXTURES

TRAINING RECOMMENDATION:

REFERENCES:

COMMERCIAL MANUALS, SECTION OPERATING INSTRUCTIONS

CONDITIONS: IN-STUDIO

CUE LIGHT FIXTURE INOPERATIVE

CONSTRAINTS: STUDIO IN USE

JOB STANDARDS:

IAW REFERENCES

ACTIVITIES:

- A SHUT OFF POWER
- A DON PROTECTIVE GLOVES
- A GAIN ACCESS TO LIGHT BULB
- A REMOVE BURNT OUT BULB
- A DETERMINE REPLACEMENT BULB FROM INFORMATION PLATE ON LIGHT
- A INSTALL NEW BULB
- A REASSEMBLE LIGHT FIXTURE
- A OPERATIONALLY CHECK LIGHT

SKILLS:

- S OPERATE LIGHTING PANEL
- S OPERATE LADDER

KNOWLEDGE :

- K INTERPRET OPERATING INSTRUCTIONS
- K INTERPRET COMMERCIAL MANUALS
- K RECALL BULB EXPLOSIVE HAZARD
- K INTERPRET LIGHT INFORMATION PLATE
- K APPLY SAFETY PRACTICES WHEN WORKING ON LADDERS
- K APPLY SAFETY PRACTICES WHEN WORKING AROUND HIGH VOLTAGES

TASK #: 00690

TASK: CLEAN ENG CAMERA OR ACCESSORIES

TRAINING RECOMMENDATION:

A			B			C		
3 SKILL LEVEL			5 SKILL LEVEL			7 SKILL LEVEL

EQUIPMENT:

ENG EQUIPMENT, LENS CLEANING KIT, SOFT CLOTH

REFERENCES:

CLEANING KIT DIRECTIONS

CONDITIONS: INSIDE, CLEAN ENVIRONMENT

CUE: DIRTY LENS, AFTER SHOOT

CONSTRAINTS: DIRTY ENVIRONMENT

JOB STANDARDS:

IAW REFERENCE

ACTIVITIES:

- A GATHER MATERIALS
- A UNPACK EQUIPMENT
- A REMOVE LENS CAP
- A CLEAN LENS
- A DUST CAMERA AND LENS BODY WITH DRY CLOTH
- A REPLACE LENS CAP
- A CLEAN CABLES AS REQUIRED WITH CLEAN CLOTH
- A PACK EQUIPMENT

SKILLS:

S OPERATE LENS CLEANING MATERIALS

KNOWLEDGE:

- K INTERPRET CLEANING KIT DIRECTIONS
- K RECALL LENS CARE PROCEDURES

TASK #: 00700

TASK: EDIT VIDEO TAPE USING ELECTRONIC TIME CODES

TASK NOTES:

EDIT DECISION LIST DEVELOPMENT IS LOCATED IN TASK 01110

TRAINING RECOMMENDATION:

A			B			C		
3 SKILL LEVEL			5 SKILL LEVEL			7 SKILL LEVEL		
(1)	(2)	(3)	(1)	(2)	(3)	(1)	(2)	(3)

REFERENCES:

DOD 5120.20-R, AFSINCR 190-3, AFBS POLICIES AND PROCEDURES LOCAL OPERATING INSTRUCTIONS, COMMERCIAL MANUALS

CONDITIONS: IN STUDIO

CUE: VIDEO FOOTAGE READY TO EDIT

CONSTRAINTS: SCHEDULING, AVAILABILITY OF EQUIPMENT

JOB STANDARDS:

IAW REFERENCES

ACTIVITIES:

- A CHECK TIME CODE AND CONTROL TRACKS FOR COUNTINUOUS FLOW
- A DUB VIDEO PORTION TO ANOTHER VIDEO TAPE IN ASSEMBLE MODE TO
CORRECT TIME CODE AND CONTROL TRACKS (IF REQUIRED)
- A DUB "B" ROLL(S) WITH TIME CODE (AS REQUIRED)
- A DUB WINDOW COPY OF ALL VIDEO TAPES
- A SELECT MASTER TAPE
- A PREPARE TWO BLACK STRIPE MASTER TAPES WITH TIME CODE
- A RECORD NARRATION AND ALL AUDIO EFFECTS ON ANOTHER VIDEO TAPE
WITH TIME CODE
- A DUB WINDOW COPY OF AUDIO RECORDED VIDEO TAPE
- A LOAD WINDOW COPY VIDEO TAPE INTO VIDEO PLAYER
- A LOAD OFFLINE MASTER TAPE INTO VTR FOR WORKING COPY
- A REVIEW WINDOW COPIES TO SELECT VIDEO PORTIONS

ACTIVITIES:

- A EDIT PROGRAM TO OFFLINE MASTER
- A PREPARE EDIT DECISION LIST (EDL) BY ANNOTATING EDITS OF TIME
CODE (TASK # 00710)
- A REVIEW PROGRAM FOR TIMING, PACING, CONTINUITY, ACCURACY
- A LOAD EDL INTO ON-LINE COMPUTER
- A LOAD FIELD FOOTAGE WITH CLEAN TIME CODES (WITHOUT WINDOWS)
- A LOAD SECOND MASTER INTO ON-LINE VTR
- A RUN EDL PROGRAM
- A REVIEW ON-LINE MASTER PROGRAM QUALITY

SKILLS:

- S OPERATE VIDEO DUB CELL WITH TIME CODE GENERATOR
- S OPERATE AUDIO BOOTH
- S OPERATE VIDEO OFFLINE EDIT CELL
- S OPERATE VIDEO ON-LINE COMPUTERIZED EDIT SYSTEM
- S OPERATE REEL TO REEL

KNOWLEDGE:

- K RECALL SIGNAL REQUIREMENTS
- K RECALL VIDEO ASSEMBLE PROCEDURES
- K INTERPRET GOVERNING DIRECTIVES
- K INTERPRET COMMERCIAL OPERATIONS MANUALS
- K RECALL EDL PREPARATION PROCEDURES

TASK #: 00710

TASK: PREPARE EDIT DECISION LIST (EDL)

TRAINING RECOMMENDATION:

A			B			C		
3 SKILL LEVEL			5 SKILL LEVEL			7 SKILL LEVEL

EQUIPMENT:

OFFLINE EDIT SYSTEM, VIDEO TAPES, OFFICE SUPPLIES

REFERENCES:

COMMERCIAL MANUALS

CONDITIONS: INSIDE

CUE: SUPERVISORS DIRECTION

CONSTRAINTS: AVAILABILITY OF EQUIPMENT, SCHEDULING

JOB STANDARDS:

IAW REFERENCE

ACTIVITIES:

- A WRITE EDL HEADINGS ON PAPER
(EVENT NUMBER; SCENE NUMBER; DESCRIPTION/SPECIAL
INSTRUCTIONS; A/V SELECT; TRANSITIONS, CUT/DISSOLVE ETC,
FRAME RATE, FROM, TO; IN POINT; OUT POINT)
- A IDENTIFY EVENT ONE FOR SCENE ONE
- A MARK EDIT IN POINT ON VIDEO PLAYER
- A MARK EDIT OUT POINT ON VIDEO PLAYER
- A MARK IN POINT ON VTR
- A SELECT VIDEO SOURCE (AND AUDIO SOURCE AS REQUIRED)
- A EDIT VIDEO
- A REVIEW EDITED VIDEO FOR IN POINT AND OUT POINT TIME CODES
- A ANNOTATE EVENT ONE INFORMATION UNDER EDL HEADINGS
- A REPEAT FOR OTHER EVENTS

SKILLS:

S OPERATE OFF LINE EDIT SYSTEM

KNOWLEDGE:

K RECALL EDL HEADINGS

K INTERPRET COMMERCIAL MANUALS

TASK #: 00720

TASK: REQUEST CLEARANCE OF COPYRIGHT MATERIAL

TRAINING RECOMMENDATION:
